

URBAN NATURE PLANS +

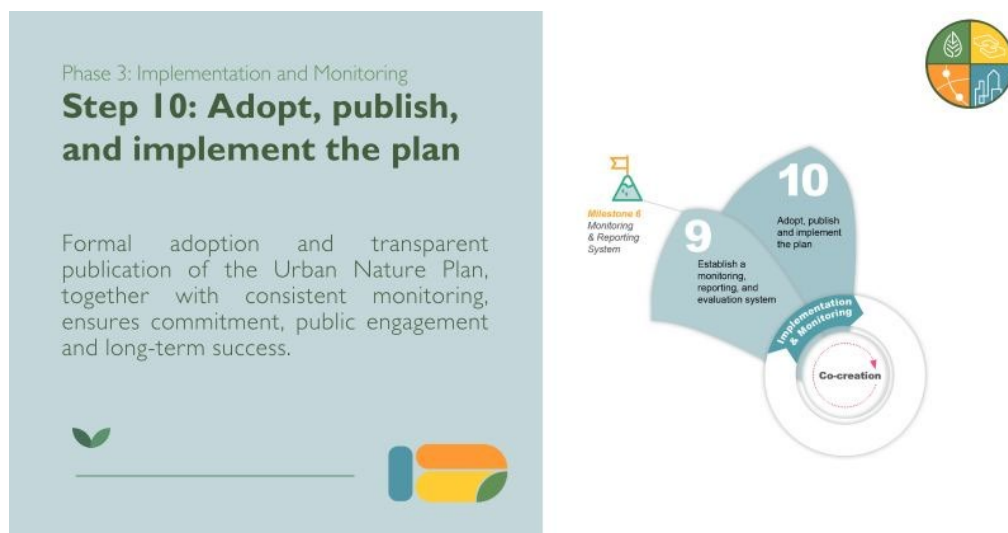

Short brief: step 10 for
urban nature plans

Urban Nature Plans – step 10

Nature belongs in our cities and urban nature plans are a key! This short brief provides an introduction to step 10 for urban nature plans.

Exploring the Process - Step 10: Adopt, publish and implement the plan

Adopting and publishing the UNP reinforces the city's commitment to its goals and ensures public engagement throughout the implementation phase. The plan should be made easily accessible, with updates and opportunities for feedback to maintain transparency and ongoing support. A formal adoption event can further build consensus and legitimacy. In this step, cities will also ensure that the plan is publicly available and that progress is consistently monitored.

Key actions:

- ✓ Finalise the draft plan.
- ✓ Secure formal adoption by the city council or relevant body.
- ✓ Ensure that the plan is publicly available and monitor progress of implementation.

Guidance	Taking Nature-based Solutions up the Policy Ladder This Knowledge Brief produced by NetworkNature aims to disentangle the complexities associated with the integration of research and policy with regards to nature-based solutions (NBS). The brief provides an overview of the NBS knowledge gaps resulting from an analysis by NetworkNature of a large number of research publications, an online consultation and strategic dialogues with key stakeholders.
Tool	Pathways for Systemic Integration of Nature-based Solutions This report identifies and elaborates the key stepping stones – pivotal actions– that can unlock the potential for mainstreaming urban nature-based solutions (NBS). Using the examples of climate change and biodiversity, we examine how stepping stones can be aligned to generate promising pathways for mainstreaming nature-based solutions that can contribute to diverse sustainability agendas in cities.
