

URBAN NATURE PLANS +

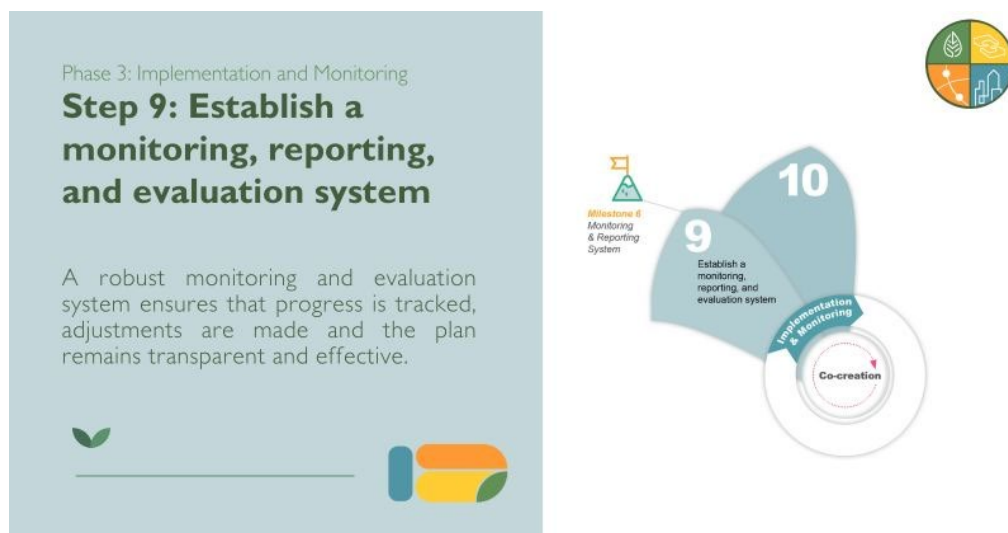

Short brief: step 9 for
urban nature plans

Urban Nature Plans – step 9

Nature belongs in our cities and urban nature plans are a key! This short brief provides an introduction to step 9 for urban nature plans.

Exploring the Process - Step 9: Establish a monitoring, reporting and evaluation system

Effective monitoring and evaluation is key to ensuring that the UNP achieves its goals and adapts as necessary. A robust system allows progress to be tracked, areas for improvement to be identified and adjustments to be made to improve outcomes. Transparency is essential to building trust, and sharing data with the public ensures that the impact of the plan is visible. This step also fulfils Milestone 6: Monitoring and reporting system, ensuring that the progress of the UNP is tracked and adjustments are made as necessary.

Key actions:

- ✓ Develop monitoring and evaluation arrangements for all indicators.
- ✓ Agree on responsibilities and budget for monitoring and reporting.
- ✓ Define process for transparent reporting and corrective action.

Guidance	Ensuring the Quality of Nature-based Solutions This Knowledge Brief produced by NetworkNature aims to explore and analyse different perspectives and perceptions of high-quality nature-based solutions (NBS). The brief provides an overview from key stakeholder groups and draws recommendations for practitioners and policymakers on how to ensure the quality of NBS interventions.
Tool	Co-Impact Tool Developed within the Connecting Nature Project, Co-Impacts is a decision-support tool allowing officers and cities to create impact assessment plans for nature-based solutions (NBS) projects. The main objective is to make the process of building a baseline and impact assessment plan straight forward and simple for anyone who wishes to do so, with the final report providing advice around suitable methodologies based on scale and project characteristics.
